

Ansh Rajveer

Software Developer | anshkanda08@gmail.com | +91 6268844871 | LinkedIn | GitHub | Portfolio

Experience

Full Stack Developer — Arinova Studio 2025 – 2026

- Built an enterprise employee management system (Next.js, Node.js, TypeScript, PostgreSQL) with biometric attendance via Face-API.js and multi-tier Role-Based Access Control (RBAC).
- Engineered RESTful APIs with Prisma ORM across 60+ models; improved query performance optimization via indexing and caching strategies.
- Integrated Razorpay payment gateway for automated invoicing, payouts, and dispute resolution in enterprise billing workflows.
- Designed real-time features using WebSockets (notifications, live updates) and collaborative diagramming with TLDraw in an Agile/Git workflow environment.

Software Developer — Revlin 2024 – 2025

- Designed and developed custom web applications for clients using React.js, Next.js, and Node.js, delivering responsive and scalable solutions tailored to business requirements.
- Managed full project lifecycle independently — from requirement gathering and UI/UX design to deployment on Vercel and Netlify — ensuring on-time delivery and client satisfaction.
- Implemented secure authentication, RESTful APIs, and third-party integrations across multiple client projects.

Projects

AI Content Generator (Next.js, TypeScript, PostgreSQL, Gemini AI) GitHub | Live Demo

- Production-ready SaaS platform with Google Gemini API, Razorpay subscriptions, and Clerk authentication supporting 50+ templates with tier-based billing and secure user management.

ShopeEase – E-Commerce Platform (MERN Stack) GitHub | Live Demo

- Full-stack e-commerce app with JWT authentication, Braintree payment integration, RBAC, RESTful APIs, and dynamic product filtering; deployed on Netlify and Render.

Real-Time Chat App (React.js, Firebase) GitHub | Live Demo

- Real-time messaging app using Firebase Authentication and Firestore with private chats, file sharing, and live user management.

Education

Computer Science — Punjab Technical University, India Aug 2023 – May 2026

- CGPA: 8.7/10 | Coursework: DSA, DBMS, OOP, Software Engineering, OS, Networking, Cloud Computing

Technical Skills

Languages: TypeScript, JavaScript, C++, Python, Java

Frontend: React.js, Next.js, TailwindCSS, Framer Motion, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, WebSockets, Microservices

Databases: PostgreSQL, MongoDB, Prisma ORM, Firebase Firestore

Tools & DevOps: Git, GitHub, Vercel, Render, Netlify, CI/CD, Docker, Unit Testing

APIs & Auth: API Integration, Gemini AI, Face-API.js, JWT, OAuth, Razorpay, Braintree, Cloudinary, Clerk

Achievements & Certifications

- **Full Stack Web Development** – Full Stack Developer
- **Accenture** – Developer & Technology Simulation
- **JPMorgan Chase & Co.** – Software Engineering SDLC
- **Accenture** – Java & Kafka Introduction

Extra Activities

- Solved **200+ coding problems** across LeetCode and GeeksforGeeks covering DSA topics including arrays, trees, graphs, and linked list.
- Active open-source contributor on GitHub with **20+ public repositories** and consistent **500+** commit history demonstrating project ownership and collaboration.
- Served as **Placement Coordinator** at university, bridging students with industry recruitment opportunities and organizing technical events.
